Cost before discount			98.64	
Discount:			-4.14	
Total to pay:			94.50	

submit

The task is to create a **point of sale entering order interface**. it allows the user to enter the product bar code and quantity and add that to the list

It should show the total

allow the user remove items

removing or adding item updates the total immediately.

and submit the whole order at the end

When the order is ready to submit. the submit button is clicked and the order issue, and the screen is ready for the next order

NOTE, It is okay if you did it completely in Javascript. If you want to use jquery to make your life easier, It is okay as well.

Helping Materials:

anyway. this is a must see episode as it teaches the basic of dom and how jquery manipulates it

<https://www.youtube.com/watch?v=j67fKGFnPJE>

this is a play list for a whole jquery course:
